Thousands of TRiO Professionals Use StudentAccess Every Day!

We started as the fastest growing TRiO software. Our first offerings were innovations like the Annual Performance Report Generator (APRG), the Multiple Student Tool, and even the Missing and Suspect Information Report.

We've proven we can offer world class tech support, while offering cost effective solutions for all TRiO grants. We've shown that our customers come first and that has driven our success. We've succeeded in meeting the needs of our customers by listening to them.

We thank the TRiO community for the opportunity to show you what we can do.

Simplify your data tracking, easily prepare your annual report, and more!

Report Navigator™

Easily find any report you need. Simply choose the report type, select desired Options, and run! You can then view in summary or detailed format; or even as a graph! You can also print your report or export it directly to Excel. It couldn't be easier!

The Original APRG™

StudentAccess created the Annual Performance Report Generator™ - the quickest and easiest way to produce the information required by the Department of Education. The APRG also includes Suspect and Missing Information Reports to alert you to potentially inaccurate information. As an added bonus you can even edit information *directly from the report* and your changes will be saved back into your StudentAccess database!

The Dynamic Report Generator™

Brought to you exclusively by StudentAccess, the DRG™ allows you to create a custom report for any group of students you wish. Just select the students to be included, choose the academic year, term (if desired) and the fields you want to see. It's that easy!

The Multiple Student Tool™

Recording group contacts, services and comments is a snap with the MST! Just select the appropriate students, enter contact or service information and with the click of a button the information is recorded in each student's record. The MST also allows you to generate a letter or email to a group of students at once.

The Most Flexible Training Options

We offer a variety of options to make it easy for you to get the training you want! Available at your campus, at our offices, or even online - dates are flexible and the itinerary can be customized to fit your unique needs.

All of this, plus secure 256-bit encryption and annual updates to meet Department of Education requirements.
